**Re: Notice of *Ex Parte* Presentation in LightSquared Subsidiary LLC  
Application for Modification of Authority for Ancillary Terrestrial  
Component, File No. SAT-MOD-20101118-00239**

---

Dear Ms. Dortch:

On January 31 and February 2, 2011, F. Michael Swiek, Executive Director of the United States GPS Industry Council (the "Council") spoke by telephone with Julius Knapp, Chief of the Commission's Office of Engineering and Technology, to discuss elements of the International Bureau's decision in *LightSquared Subsidiary LLC*, DA 11-133 (Int'l. Bur., released January 26, 2011) ("*LightSquared Order*"). In particular, Mr. Swiek and Dr. Knapp discussed the working group the Bureau ordered established to investigate the concerns the Council and other parties to the above-referenced application proceeding have expressed about the prospect of harmful interference from terrestrial mobile operations in the 1525-1559 MHz mobile-satellite service band into receivers and other devices utilizing the signals of the Global Positioning System ("GPS") satellites in the adjacent 1559-1610 MHz band.

The January 31 discussion included an exchange about the Council's participation and role in the working group, overall composition of the working group, and the aims and functioning of the working group. The February 2 discussion included a further exchange about the functioning and objectives of the working group.

By this letter, and in accordance with Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, two copies of this letter are provided for inclusion in the Commission's files.

Marlene H. Dortch
